- ▶ Portugal's rich wine culture and history dates back to ancient times.

The earliest evidence of wine production can be traced back to the Phoenicians and the Romans, who established vineyards along the coast and in the Douro Valley. In the Middle Ages, the Moors introduced new grape varieties and winemaking techniques, which further developed the industry.

In the 18th century, the port wine industry in the Douro Valley boomed and became a major export for the country.

In recent years, Portugal has seen a resurgence in its wine industry, with a focus on producing high-quality wines using traditional grape varieties and winemaking methods. The country has over 250 grape varieties, making it one of the most diverse and respected in the world.

Portugal's wine culture and history are diverse, rich, and steeped in tradition, making it a must-visit destination for wine lovers.

Let's raise a glass to that!
